

Welcome Spring! As we enter the final stretches of the year, the students will be taking part in golf and track, state competitions, and field trips that will surely be filled with learning and fun!

This week a team of staff from the high school joined up with a group from Big Horn #1 to visit a couple of different school systems that are addressing personalized learning in different ways. The staff has been engaged, as is the Board of Trustees, in a book study that is looking at mass customized, or personalized, learning. The goal of the study as well as the visits is to jump-start the district in its strategic plan renewal later this year. We will spend the next school year developing plans to take personalization to the next level in the district. We look forward to sharing with the community the opportunity to make learning in the district focused on maximizing students' success.

Look forward to updates in the coming months that detail how we are taking what we are doing now in the district and either maintaining it, updating it, or letting go of it. We look ahead to creating stronger future stories with our students and identifying and putting into play stronger career pathways for students to explore future occupations as well as develop integral skills needed to be prepared for that career path. We will develop stronger integration of technology into day-to-day curriculum work in order to transform learning for students. All this is how we work to work toward our vision of inspiring all learners to be the "Best on Earth."
