

Congratulations Class of 2014! We witnessed the efforts of our graduating seniors as they passed across the stage a few weeks ago, earning their high school diplomas. This phase of life opens up a number of doors for young people, whether it be heading off to college or entering the world of work! We also wrapped up the year with all of our other students, with brand new kindergarteners getting the chance to spend a day in our building and other students getting the chance at the elementary track meet and move up day as well.

For parents and students, consider checking out <http://summermath.tenmarks.com> for various math activities and games to help students in grades 1-Algebra II at the high school level. It is free this summer to families in Wyoming! We also encourage our students and parents to take advantage of the Upton library's summer reading program. It is a great way to encourage reading and learn many new and interesting things! When students are craving the outdoors, make sure that they visit the Upton Swimming Pool to cool off on these hot days ahead! Hours and admission information is available by calling 307-468-2461. On July 19th (during Fun Days), the pool will be open with NO admission charges!

We have a number of projects that will be taking place this summer at both the elementary and the high school. Most notably, we will be refinishing the high school gym floor beginning June 16th, so look for times and locations of open gym sessions for our MS/HS students.

Enjoy the great days of summer ahead!
